

Education/Training

As a transformation agency, GBC Indonesia invites all levels of society to know and understand the concept of green buildings and apply it in their lives and activities.

For this reason, GBC Indonesia prepares 4 regular training :

1. GREENSHIP Associate (GA) Training
2. GREENSHIP Professional (GP) Training
3. EDGE Experts
4. EDGE Auditor

[View Schedule](#)

What's On

GREENSHIP Associate (GA) Training

GREENSHIP Associate (GA) training is a basic level education on green building, with the aim of providing insight into the principles related to green building. In GA training, participants will be introduced to green movement, the basic concept of the GREENSHIP Rating Tools assessment, the certification process and the values carried in GREENSHIP. After attending the GA training, participants can have the same view, understanding and knowledge of the principles of green building and GREENSHIP.

Training objectives:

- Understand what climate change is
- Understand why green building
- Understand the basic and philosophy of green building.
- Become a Green Ambassador
- Creating a Green Team in the company

Prerequisite:

- Minimum a high school graduated or equivalent

This training has also been packaged Online so that participants have the opportunity to take part in training with a more flexible time in their busy activities or work and can be accessed anywhere safely. To maintain the quality of training, at each change of topic, participants are required to fill out a quiz with specific target points to be able to access the next training module. And at the end of the training, each participant is required to write an essay on topics related to green building.

GREENSHIP Professional (GP) Training

An advanced education of GREENSHIP Associate, in order to achieve competency as a profession that can play a role as an expert for green building implementation; working together with design team, consultants, contractors, engineers, building owners and GREENSHIP certification team in implementing the concept of green building based on the applicable criteria from GREENSHIP rating tools.

Training objectives:

- Become an Green Building Expert/Consultant
- Understand the procedures for measuring the use of energy, water, air, green products, and waste management
- Conduct an overall analysis of the opportunities and constraints of a building becoming a green building based on the criteria for the GREENSHIP assessment tool.
- Devise strategies for achieving green buildings by working with consultants, building owners and project implementation teams to achieve the desired GREENSHIP certification targets.

Prerequisite:

- Passed GREENSHIP Associate (GA) Training

Minimum Bachelor degree in Engineering or Architects, or non-engineering background with at least 3 years experience working in the building industry (construction or building management) The implementation of GP Training during the Covid 19 pandemic is held live streaming for 5 days from 08.00 to 18.00 WIB followed by working on project group assignments and ending with group project exam and writing exam.

In addition to these regular trainings, GBC Indonesia holds regular workshops for those who wish to deepen a topic related to green building criteria. GREENSHIP Professional (GP) graduates who attend the workshop, will get KUM (points for the extension of the GP profession).

EDGE Experts

In conducting certification, building owners often need the help of experts to assist in the certification process. EDGE Experts are experienced experts who can assist building owners and design teams through the EDGE certification process. EDGE Expert can perform software simulations and provide suggestions for the best solution according to the client's aspirations to meet EDGE standards. With skills, insight and in-depth understanding of EDGE, an EDGE Expert can provide a cost-benefit analysis of the green building concept that will be applied. By becoming an EDGE Expert, you can help your clients to better understand green building principles, EDGE standards and tools and facilitate clients in filling out applications when needed.

EDGE Expert Qualifications:

- Passed GREENSHIP Professional Training, **or**
- Have a minimum of 3 years experience working in the construction industry and minimum education S1

EDGE Expert Training Prerequisites:

There are no prerequisites for anyone interested in joining the EDGE Expert Training. EDGE Clients or other interested Parties who are not interested in qualifying as an EDGE Expert will be encouraged to attend this Training.

EDGE Auditors

EDGE Auditors are those who have passed the EDGE exam, attended EDGE Auditor training, and signed an agreement with GBC Indonesia. EDGE Auditor is tasked with examining and reviewing all evidence submitted by the project team (including EDGE Experts) in meeting EDGE standards. The EDGE Auditor will conduct a design (document) audit as well as a field audit and present the results of the audit to the certification partner and be responsible for the audit results. Professional certificates for EDGE Auditors are valid for 2 (two) years and can be extended by meeting applicable regulations, including a track record of professionalism in handling EDGE certification projects and not violating the applicable professional ethics.

Stages of becoming an EDGE Auditor:

I. Qualified EDGE Auditor:

1. Registered as an accredited EDGE Expert (including having attended EDGE Expert training and passing the EDGE Exam)
2. The applicant may submit proof of application that matches the qualifications in the form of one of the following:

- i. Current curriculum vitae, signed by the applicant; and
- ii. Relevant project records;
- iii. Alternative evidence, which will be considered on a case by case basis.

II. Following the EDGE Auditor Training:

Participants have attended the EDGE Expert Training and have passed the EDGE Exam. Participants can register by completing the proof of application. New candidates will be invited to attend training after their application is approved.
